

ABSTRACT

Corona Management System is capable of managing each and every data--: Regarding Corona Patients, Doctors, Hospitals, etc. Corona Management System helps Government and other concerned authorities in making effective policies because of proper flow of information from ground Reality to higher levels. There will be different portals for different authorities and management and public too, so that everything is well planned and systematic. Given the huge volume of data this entails, it is only fitting that we use a database management system for controlling all these data. It is a fast, secure and a digital way to manage your doctor bookings and maintain your record.

ACKNOWLEDGEMENT

I express my gratitude to our institution and management for providing us with good infrastructure, laboratory, facilities and inspiring staff whose gratitude was of immense help in completion of this seminar successfully.

I express my sincere gratitude to our principal, **Dr. Prakash M R** for providing required environment and valuable for developing this mini project.

My sincere thanks to **Dr. Ajith Padyana**, Head of the Department, Computer Science and Engineering, Acharya Institute of Technology for his valuable support and for rendering us resources for this mini project work.

I express my gratitude to **Prof. Swathi U** Assistant Professors, Dept, Computer Science and Engineering, Acharya Institute of Technology who guided me with valuable suggestions in completing this mini project at every stage.

My gratitude thanks should be rendered to many people who helped me in all possible ways.
